Infant car seat

---

The German Design Award is the international premium award of the German Design Council. Its objective is to discover, to present and to award unique design trends.

The committee of the German Design Council nominated three products of the brand HEYNER® for participation in the German Design Award 2017 - Excellent Product Design. Ergonomics, functionality and handling, overall concept, sustainability. These are only some of the criteria according to which the jury will rate the nominated and submitted works on 21 and 22 July 2017. Thanks to the unique nominating procedure, only the products will be invited for participation, which demonstrably stand out due to their design quality.
